

Finding fractions of time

When talking about time we use fractions: for example, half past three or quarter past five.

1. Shade in half and quarter of an hour on these clocks.

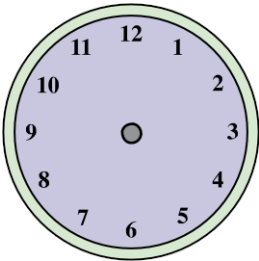

half an hour

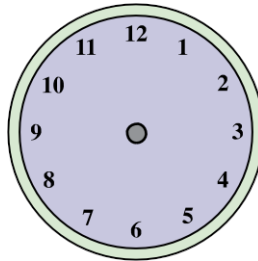

quarter of an hour

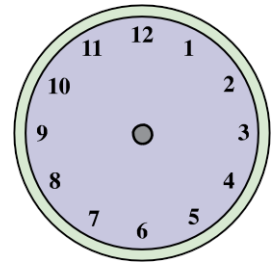

2. Show on the clocks where the minute hand would be for:

quarter past the hour

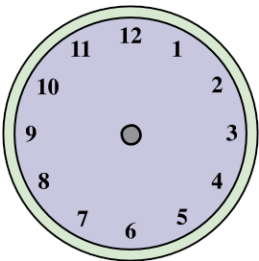

half past the hour

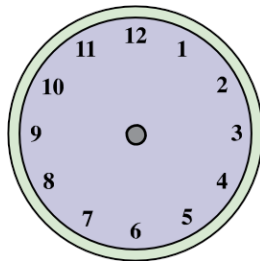

quarter to the hour

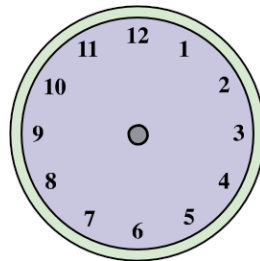

3. Draw on the clocks the hour and minute hands to shows the following times:

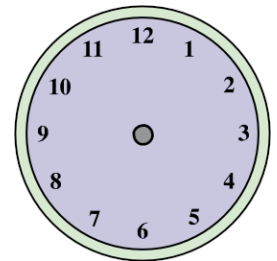

half past four

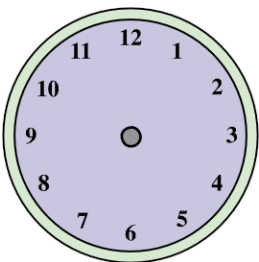

half past twelve

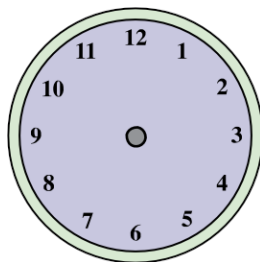

2.30

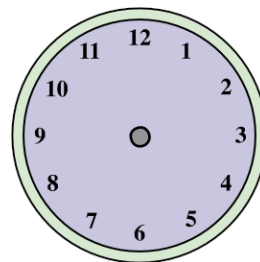

10.30

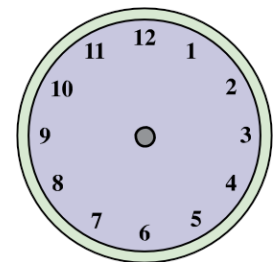

quarter past one

quarter to eight

11.15

9.45
