

Hand washing is important!

It stops germs from spreading and making us sick.

Remember to wash your hands properly for 20 seconds with soap and warm water.

Why not sing this song while you wash your hands?

Sing it to the tune of *Row, Row, Row Your Boat*.

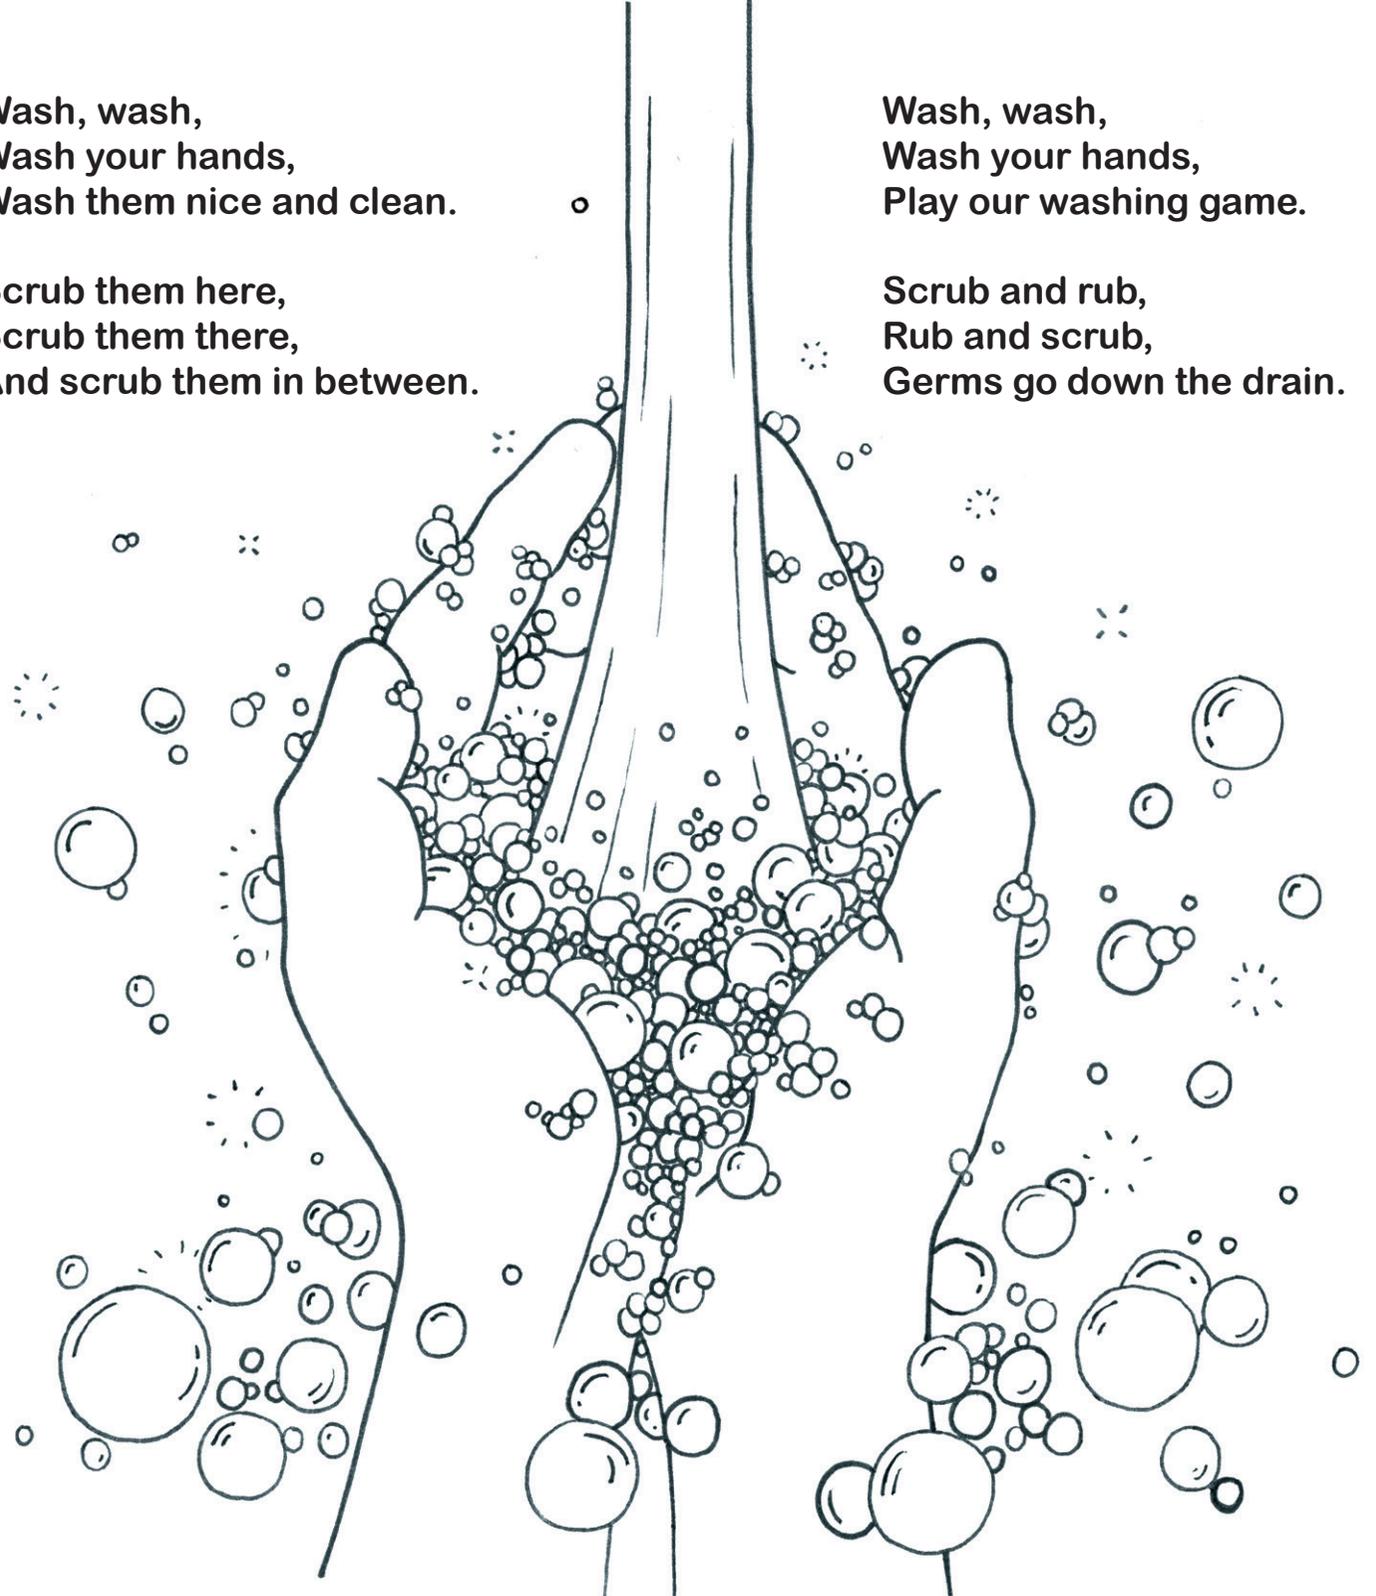

For more ideas see
www.thehandsonproject.blogspot.com

Wash, wash,
Wash your hands,
Wash them nice and clean.

Scrub them here,
Scrub them there,
And scrub them in between.

Wash, wash,
Wash your hands,
Play our washing game.

Scrub and rub,
Rub and scrub,
Germs go down the drain.

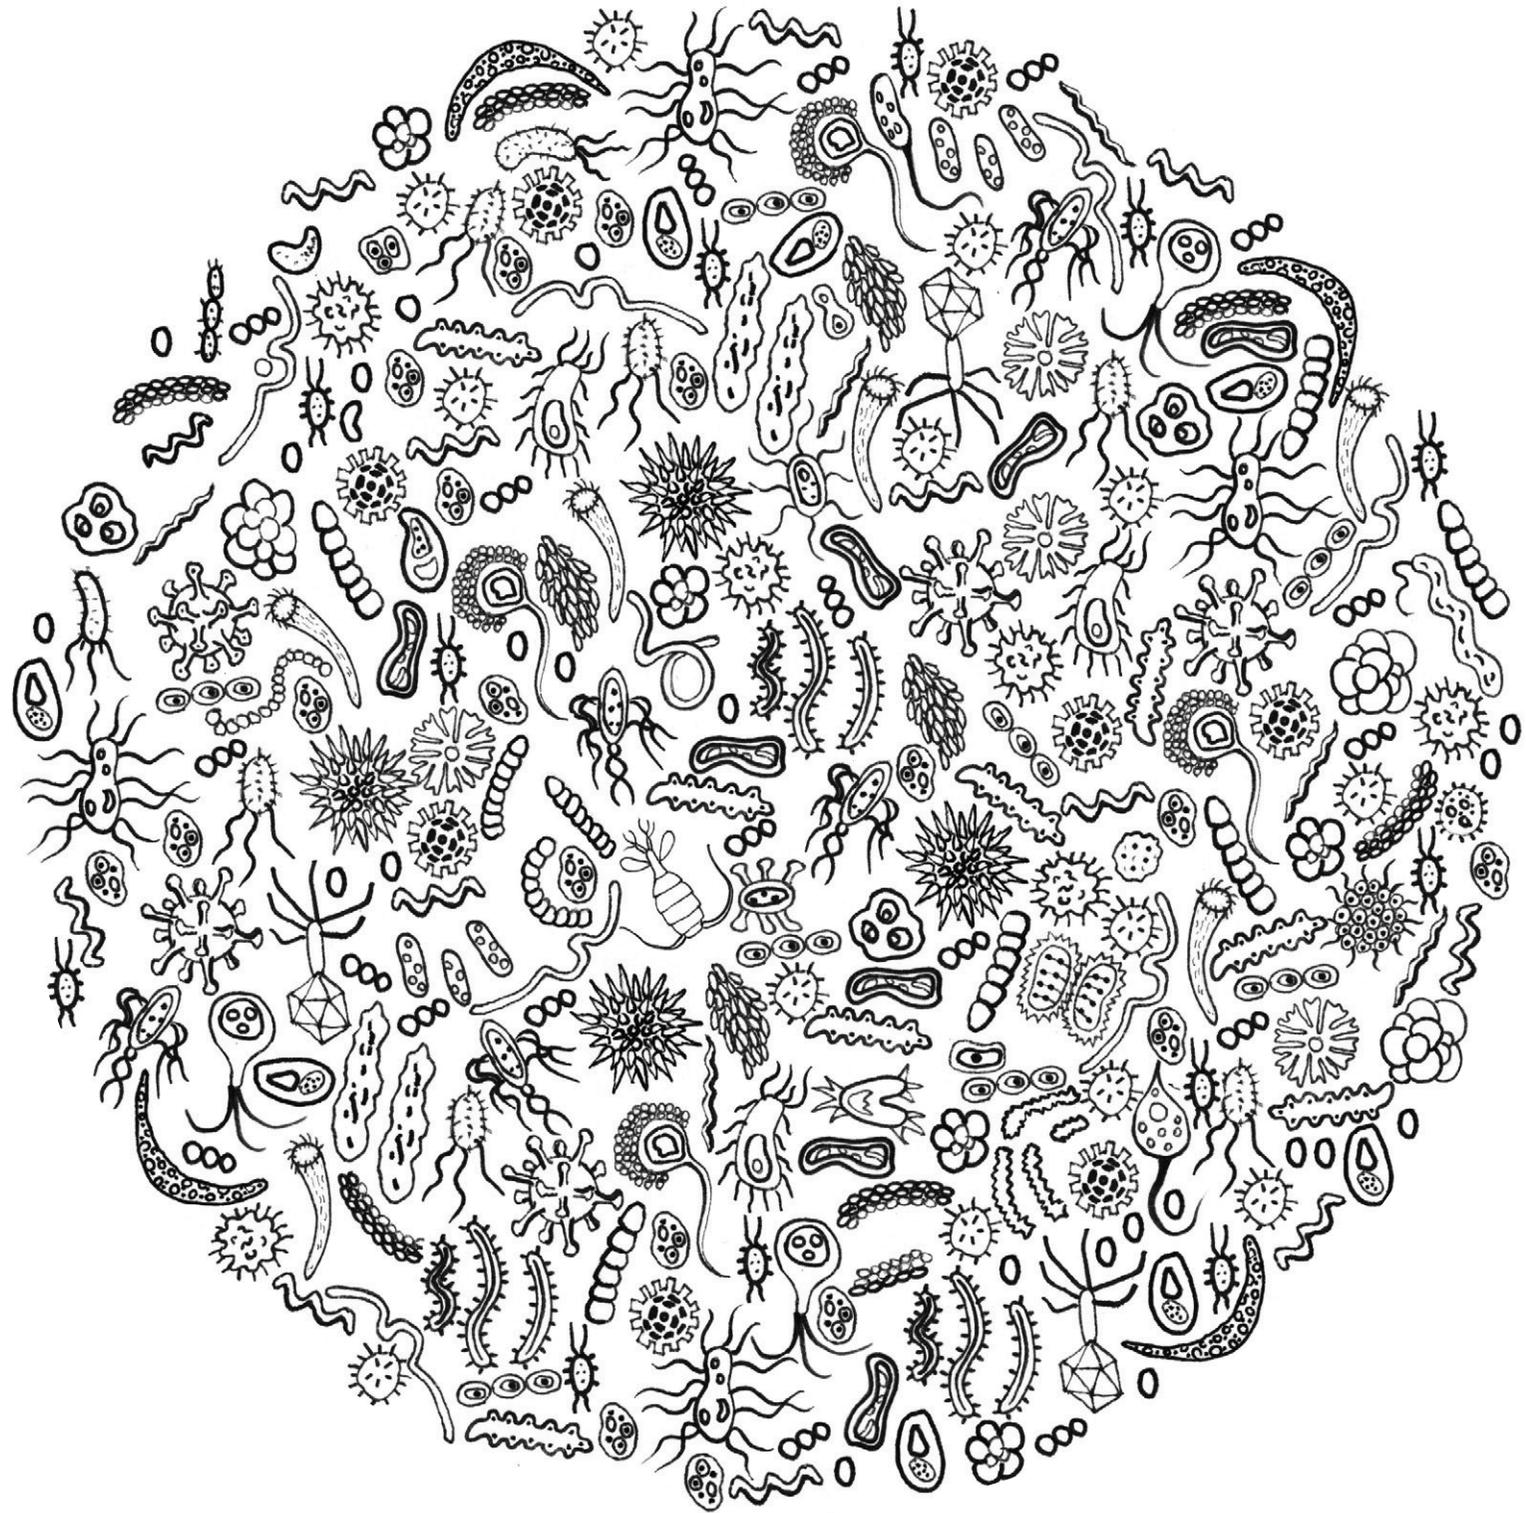

These are Germs.

Germs are tiny living things.

They are so small we can't see them.

1. Place your hands on the germs.
2. Draw around each hand.
3. Colour in the germs that are inside your hands to make them more visible.

Germs are everywhere.

They come in all shapes and sizes.

Transform these shapes into germs.

Add patterns, textures and features like...

Hairs

Suckers

Tentacles

See what weird and wonderful creatures you can create in this microscopic world.
